West Virginia DHHR and
Clarksburg Water System to study
older homes with lead service
lines | WV News | wvnews.com

CHARLESTON, W.Va. (WV News) — The West Virginia Department of Health and Human Resources, Bureau for Public Health's Office of Environmental Health Services is working with the Clarksburg Water System to identify older homes with lead service lines that may contain elevated lead levels in drinking water.

Subject: RE: [External] Clarksburg Order

I quickly reviewed WVDHHR's order and it appears that they have included all of our comments. If anyone feels otherwise, please let us know.

We suggested they spell out in the order specific steps the water system must take when conducting lead service line replacements. They mandated in the order that the water system follow the requirements of 40 C.F.R. §141.84 which spells out those specific steps, so they did require the water system to follow those steps despite the fact that §141.84 would normally only apply to water systems that have exceeded the lead action level.

Also attached is an email I just received from WVDHHR which forwards their press release that they just issued along with a copy of the final order.

Let me know if you have any questions.

Rick

Subject: FW: [External] Clarksburg Order

WVDHHR just sent the signed AO. See attached. They confirmed that it was sent to Clarksburg via email this morning and hard copy was mailed via certified mail.

I am looking at the final version and comparing it to our comments sent to determine if they included our comments and will get back to you all in a bit on the outcome of that review.

Good morning,

Was WVDHHR able to issue the Order to Clarksburg Water Board yesterday? If the order was issued, could you share a copy of the final version?

Thanks,

Rick
